NOUR WAEL

GRAPHIC DESIGNER

WHA

I am a graphic designer specializing in social media designs and brand identity. My passion for graphic design started in my final year of high school, and since then I have been continuously developing my skills through self-learning and consistent practice. I believe design is not just about aesthetics, but a powerful tool for communication and building impactful brand identities. I work with passion and attention to detail to transform ideas into designs that clearly reflect a brand's personality and leave a lasting impression
